VOLUNTARY ANNOUNCEMENT
RECOMBINANT POLIOMYELITIS VACCINE OBTAINS CLINICAL
TRIAL APPROVAL IN INDONESIA

This announcement is made by CanSino Biologics Inc. (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis.

The Company is pleased to announce that it has obtained phase I/II clinical trial approval granted by the Badan Pengawas Obat dan Makanan, Republik Indonesia to initiate relevant clinical trials for the Recombinant Poliomyelitis Vaccine (“**CS-2036**”) developed by the Company.

Based on the protein structure design and virus-like particle (“**VLP**”) assembly technology of the Company, CS-2036 candidate is a non-infectious polio VLP vaccine with good safety and immunogenicity profiles that does not rely on live virus in the manufacturing process. Non-infectious polio VLP-based vaccines are recommended by the World Health Organization as one of the preferred vaccines for polio in the future expected to be an ideal post-eradication polio vaccine. The CS-2036 candidate can also be a component of combined vaccines, which will facilitate broader dissemination to aid in the eradication of polio.

The phase I/II clinical trials will further evaluate the safety and immunogenicity of CS-2036 in infants and toddlers in certain ages.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
CanSino Biologics Inc.
Xuefeng YU
Chairman
