VOLUNTARY ANNOUNCEMENT
ACCEPTANCE OF NEW DRUG APPLICATION
FOR TETANUS VACCINE

This announcement is made by CanSino Biologics Inc. (the “**Company**”) on a voluntary basis.

The Company is pleased to announce that the National Medical Products Administration of the People's Republic of China has recently granted a notice of acceptance to the Company's new drug application for the absorbed tetanus vaccine (the “**Tetanus Vaccine**”) developed by the Company.

Tetanus is an acute infectious disease caused by *Clostridium tetani*. *Clostridium tetani* produces an exotoxin known as tetanospasmin, which is the pathogenic agent of tetanus, causing generalized tonic contraction of skeletal muscle and paroxysmal spasms. Severe cases may develop complications such as laryngospasm, asphyxiation, pulmonary infections, and organ failure, with a mortality rate reaching 30%-50%. The mortality rate of tetanus approaches 100% without medical intervention, making it an extremely severe and potentially fatal disease.

The Company has developed the Tetanus Vaccine which is fermented with animal-free culture medium and is thus safer. Furthermore, stable industrial scale processes have been identified. This vaccine primarily targets for non-neonatal tetanus prevention, which will expand the Company's product pipeline and enhance its core competitiveness.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
CanSino Biologics Inc.
Xuefeng YU
Chairman

Hong Kong, February 6, 2025
